SecureVac™ Immobilization System

SecureVac Cushions

SecureVac Cushions are popular reusable, customizable device in the radiation therapy community. The wide range of shapes and sizes allow for custom immobilization of the patient's extremities, head and whole body. The cushions are constructed from a strong nylon material and are filled with polystyrene spheres.

SecureVac Cushions maintain their shape throughout the treatment cycle and can be used with a variety of adapters to reproduce patient setups.

Demonstration Video

 Made in the U.S.A.

**BUILT-IN
ANTIMICROBIAL
PROTECTION**

Antimicrobial exhibits long lasting efficacy against a broad spectrum of microorganisms which is effective against cross-contamination during storage and after patient interaction.

MR Safe

MR Safe SecureVac Cushions are available. Longer lead times will apply. Ask your account manager for more details.
